**RESOURCE**

# Technology Policy Assistance Facility

**A contribution to the Task Force on Artificial Intelligence, Data Governance and Innovation for Sustainable Development, to support the development of national strategies, policies and laws for G20 members and the global South more generally. This acknowledges the opportunity for the G20 to advance a collaborative and multilateral approach in AI governance in a manner that supports the SDGs and promotes equality.**

Knowledge partner: UNESCO

**TECHNOLOGY POLICY ASSISTANCE FACILITY**

Accelerating technological evolution -- especially in the artificial intelligence (AI) space -- offers not only tremendous opportunity but also profound challenges for the policymakers responsible for ensuring these new tools are used for the benefit of all.

Mindful of capacity gaps, the risks of policy fragmentation, and the uneven distribution of both resources and technical expertise, the G20 AI Task Force, with support from UNESCO, developed the Facility to support governments and stakeholders in developing and enacting impactful strategies, policies, and legislation aligned with the public good.

Designed as a one-stop policy development hub, the Facility assembles resources to help policymakers research best practices, design detailed yet custom-tailored policy plans, and connect with international experts who can help translate ideas into policy in action.
